

Medical Practice Technology Assessment (MPTA)

Overview

Our Medical Practice Technology Assessment assesses the clinical efficacy, safety, and cost of specific technologies. We evaluate the workflow and economic impact of health care programs and EMR innovations.

A technology assessment is a deliverable document with value, not just a sales assessment. The process of assessing includes meeting with key personnel to determine both the alignment of current technology investments and how future functionality parallels business direction.

- *We help you understand your capacity for beneficial change*
- *Vendor neutral medical software research, advice, and selection help for Electronic Medical Records, Billing, Patient Scheduling, and Accounting software*

About OntarioMD Funding

As Ontarians expect the march toward an Electronic Health Record for 2015 to continue it's imperative to set expectations and dispel some myths, especially in light of the EMR funding announcement. The announcement of Ontario physicians receiving funding for signing up to a provincially approved EMR has raised many questions. The large misconception about the EMR funding model is it's misalignment with software upgrades and monthly support fees associated with EMR vendor costs. IES Group has experienced staff and partners to help you understand how successful implementation of electronic records with built in decision support, clinical data exchange, billing and quality reporting will match your practices workflow and employee resources.

Making EMR's Really Work

We help you understand you capacity for beneficial change and examine your practice workflow, network infrastructure, security, software architecture and IT business practices. Our trained staff and partners have not only been through EMR implementations, but lived EMR as part of their careers in Ontario practices.

Key Benefits

We can help you understand the following:

- *Transition from paper patient records to an EMR*
- *If it is worth it and do I need to do it more than once?*
- *What is the cost/benefit from the physician's perspective?*
- *Is it sustainable?*

Why IES Group?

IES Group has over a decade of experience implementing complex workflow, software modeling & reporting systems empowering quick real-time information based decisions.
