

Fonality IP-PBX Voice Solutions

Overview

Fonality develops IP-PBX software voice solutions for small and medium sized businesses. Depending on the size of your operation and needs Fonality offers several flavour's; trixbox CE, trixbox Pro and PBXtra. Fonality's solutions are designed to replace the old PBX and Keystone phone systems we see in most offices today.

How are Fonality's solutions different from Cisco's UC offering? Example Fonality's trixbox is available free as an open source solution that you can run on your existing server. The Cisco UC product includes; routing, firewall, VPN, wireless and an integrated power over ethernet switch, etc.

Fonality IP-PBX voice solution for small and medium sized businesses provides voice, voicemail, automated attendant and video capabilities while integrating with existing desktop applications such as calendar, email, and customer relationship management (CRM) programs.

Fonality IP-PBX Voice Solutions Features

- Eliminate vendor lock in. With Fonality systems you can mix and match hardware.
- The Fonality IP-PBX solutions are a scalable platform. Adding more phones is simplified.
- Softphones and the video calls. Fonality solutions support software based phones that can also integrate with your web cam. Imagine while working remote having your office phone extension available to you on your notebook or pc.
- Session Initiation Protocol (SIP). Fonality solutions support the SIP protocol. SIP is the industry standard for placing voice and video calls over the internet. SIP is a leading technology that translates into savings for your business.

Key Benefits

- *Fonality solutions are much easier to install and support than a standalone proprietary PBX or Keystone phone system.*
- *Easier to manage with a user friendly web based configuration interface.*
- *Eliminate phone system wiring. Fonality systems run on your existing CAT 5 or 6 data network.*
- *Fonality solutions are significantly less expensive than Cisco UC, Nortel, etc...*

Why IES Group?

IES Group has over a decade of experience implementing complex IT Solutions empowering quick real time information based decisions.
